

## **Infiscape Opens for Business**

Ames, Iowa, March 18, 2004. Infiscape Corporation has announced that it recently opened for business. Infiscape helps people fully utilize the capabilities of immersive visualization and high-end 3D graphics through consulting, software development, training, and support services.

Immersive visualization is used for an ever-increasing number of applications in many industries, such as manufacturing, scientific visualization, entertainment, and visual simulation. Through its variety of services, Infiscape gives its customers the practical engineering experience and the creative problem solving skills that they need to meet their goals.

The founders of Infiscape are Allen Bierbaum, Carolina Cruz-Neira, Patrick Hartling, and Terry Welsh. They have extensive experience in immersive, interactive visualization, networked virtual environments, advanced rendering techniques, physical simulation, content creation, and art. The founders include the original designers and principal authors of VR Juggler, a former SGI Applied Engineer, and the inventor of CAVE™ technology. Infiscape also maintains a pool of highly skilled contractors to draw from on a project-by-project basis.

Now open for business, Infiscape welcomes discussion with anyone interested in immersive visualization. Infiscape is also interested in pursuing business relations with partner companies and independent contractors. More information can be found at [www.infiscape.com](http://www.infiscape.com) or by contacting Terry Welsh at [terry@infiscape.com](mailto:terry@infiscape.com).
